

Project	Description	Key Features
AI Medical Diagnosis Assistant	An AI system that helps users identify possible diseases based on symptoms and provides health insights. It assists doctors and patients but does not replace professional medical advice.	• Symptom Checker • Disease Prediction • Medicine Information • Appointment Booking • Medical History • AI Chat Assistant
AI-Powered Placement Interview Preparation Platform	An intelligent platform that prepares students for campus placements using quizzes, coding tests, AI mock interviews, and personalized learning.	• Aptitude Quiz • Technical MCQs • Coding Practice • AI Mock Interview • Resume Analysis • Company-wise Preparation • Progress Dashboard
AI Retail Shop Without Cashier (Amazon Go Style)	A smart retail store where customers simply pick products and leave. AI cameras automatically recognize products, calculate the bill, and process payment without cashier intervention.	• Face Recognition • Login Customer Tracking • Product Recognition • Virtual Shopping Cart • Automatic Billing • Digital Payment • E-Receipt • Inventory Management • Theft Detection • Admin Dashboard
AI-Based Fertilizer Recommendation System	Uses soil data and crop information to recommend the most suitable fertilizer and quantity to improve crop yield.	• Soil Analysis • Crop Selection • Fertilizer Recommendation • Weather Integration • Nutrient Deficiency Detection • Recommendation History
Diet & Calorie Tracking App	A smart health application that tracks daily food intake, calories, water consumption,	• Food Logging • Calorie Counter • Barcode Scanner

	and exercise while providing AI-based diet suggestions.	• Meal Recommendation • Water Reminder • Weight Tracker • Health Dashboard
AI Debate Coach	An AI-powered platform that helps users improve communication and critical thinking by conducting debates and evaluating responses.	• Topic Selection • AI Opponent • Argument Evaluation • Grammar Check • Confidence Score • Debate History • Performance Analytics
