PROJECT

SECURED ATM AUTHENTICATION USING FACIAL RECOGNITION

Objective:

To develop a secured ATM system using facial recognition and deep learning techniques to accurately verify users, reduce debit card fraud, prevent unauthorized access, and improve the overall safety and reliability of ATM transactions.

Technology: HTML, CSS, JS

- The system secures ATM transactions using facial recognition with real-time verification and alerts.
- It reduces fraud, prevents unauthorized access, and improves transaction safety through automated authentication and reporting.
